ACI Notice Manual

1.0.2

Data   Section: 1.1

Name:	data
Full Path:	aciNotice.data
Type:	String Value
Is Required?:	Yes
Minimum Length:	8
Maximum Length:	20
JSON Reference Data:	https://borderconnect.com/data/data-types.json

Sample JSON:

"data": "ACI_NOTICE"

Description:

– Used to indicate the type of data the JSON file contains. e.g. for an ACI Notice, the value will be "ACI_NOTICE"

– A list of acceptable data types can be found here: http://borderconnect.com/borderconnect/data/data-types.json

Company Key   Section: 1.2

Name:	companyKey
Full Path:	aciNotice.companyKey
Type:	String Value
Is Required?:	No
Minimum Length:	1
Maximum Length:	30

Sample JSON:

```
"companyKey": "c-9000-2bcd8ae5954e0c48"
```

Description:

– Used when connected as a service provider to identify which company account the API Response pertains to. Will exactly match company key for the account.

Date Time   Section: 1.3

Name:	dateTime
Full Path:	aciNotice.dateTime
Type:	String Value
Is Required?:	Yes
Minimum Length:	19
Maximum Length:	19

Sample JSON:

"dateTime": "2014-11-01 04:55:12"

Description:

- Indicates the date and time at which the ACI Notice was processed by BorderConnect.

CBSA Date Time   Section: 1.4

Name:	cbsaDateTime
Full Path:	aciNotice.cbsaDateTime
Type:	String Value
Is Required?:	Yes
Minimum Length:	19
Maximum Length:	19

Sample JSON:

"cbsaDateTime": "2014-11-01 04:55:12"

Description:

– The timestamp provided by the Canada Border Services Agency (CBSA) to indicate their own internal processing time.

Type   Section: 1.5

Name:	type
Full Path:	aciNotice.type
Type:	String Value
Is Required?:	Yes
Minimum Length:	1
Maximum Length:	50
JSON Reference Data:	https://borderconnect.com/data/ca/aci/aci-notice-types.json

Sample JSON:

"type": "ARRIVAL_REPORTED"

Description:

- Indicates what type of ACI Notice it is.
- For a list of notice types, click here: http://www.borderconnect.com/borderconnect/data/ca/aci/aci-notice-types.json
- The Arrival Reported notice lets the carrier know that the ACI Trip has been reported as arrived at the border by CBSA.
- The Functional Acknowledgement notice is not currently offered by BorderConnect.
- The CSA Reported notice is confirmation from CBSA that an ACI Shipment has been reported with CSA as the Shipment Type.
- The Insufficient Review Time Warning notice means that, based on the ETA reported on the manifest, CBSA would not have an hour to review the manifest before the truck arrives at the border, so it does not comply with the hour prior notice regulation. This notice can be ignored so long as the carrier allows at least one hour from the time the manifest is accepted to the time they physically arrive in Canada.
- The Matched notice lets the carrier know that another electronic submission has been made quoting the same Cargo Control Number as their ACI Shipment. Most commonly, this is for a PARS shipment and the Matched notice indicates that the customs broker has submitted an entry for that PARS number. Please note however that this notice does not mean the broker's PARS is accepted, only that it was submitted. The carrier cannot rely on the Matched notice as a means of checking on PARS status with the broker.
- The Not Matched notice is the opposite of the matched notice. It means that no other electronic submission has been made quoting the same Cargo Control Number as their ACI Shipment.

Trip Number

Section: 1.6

Name:	tripNumber
Full Path:	aciNotice.tripNumber
Type:	String Value
Is Required?:	No
Minimum Length:	8
Maximum Length:	25

Sample JSON:

`"tripNumber": "12345454"`

Description:

– The trip number of the ACI eManifest that the ACI Notice applies to. Will not appear for ACI Shipment notices.

Cargo Control Number   Section: 1.7

Name:	cargoControlNumber
Full Path:	aciNotice.cargoControlNumber
Type:	String Value
Is Required?:	No
Minimum Length:	8
Maximum Length:	25

Sample JSON:

"cargoControlNumber": "12345454"

Description:

– The cargo control number of the ACI Shipment that the notice applies to. Will not appear for ACI Trip notices.

References   Section: 1.8

Name:	references
Full Path:	aciNotice.references
Type:	Array<String>
Is Required?:	No
Minimum Length (of element in array):	8
Maximum Length (of element in array):	25
Minimum Items (of elements in array):	0
Maximum Items (of elements in array):	200

Sample JSON:

```
"references": [ "342432432", "3424355632", "342444466" ]
```

Description:

– Currently only used with the Arrival Reported notice. In this case the list will represent Cargo Control Numbers that are reported as arrived on the ACI Trip.

– Will not appear for ACI Trips with no attached ACI Shipments.

– This list is expected to be used for other purposes as CBSA continues to release new types of ACI Notices.
